REACH & RoHS

Dear Sir or Madam,

we would like to inform you about our approach regarding the REACH regulation (EC) No. 1907/2006 as well as the compliance with the RoHS directive 2011/65/EU and 2015/863/EU.

Status: 20.05.2020

As our products are classified as articles according to REACH, no preregistration numbers or registration numbers are required for our products. According to REACH we are a "downstream user" (DU).

- We hereby confirm that we comply with our obligations under REACH
- We confirm that all requested upstream suppliers have pre-registered or registered their substances that are subject to registration
- We will inform our customers in a timely manner if, contrary to expectations, a substance is not reaistered

With regard to Directive 2011/65/EU and the delegated Directive 2015/863 (valid from 22 July 2019) of the EU Parliament and Council on the restriction of the use of certain hazardous substances in electrical and electronic equipment (RoHS), we can also confirm that the following ingredients are not part of the formulation and therefore the occurrence of these substances in our products is improbable and not to be expected:

- Lead (< 0.1 %)
- Mercury (< 0,1 %)
- Cadmium (< 0,01 %)
- Chromium VI (< 0,1 %)
- Polybrominated biphenyls (PBB) (< 0,1 %)
- Polybrominated diphenyl ethers (PBD) (< 0,1 %)
- DEHP, BBP, DBP, DIBP (each < 0,1 %)

The products we manufacture do not currently contain any substances with more than 0.1% weight per product that are included in the ECHA's candidate list of substances of very high concern (SVHC) (Regulation (EC) No 1907/2006).

We follow the candidate list and inform you promptly if any changes occur. The current candidate list can be found on the ECHA website: http://echa.europa.eu

With kind regards

m3profile GmbH
